

Key features

- True double-conversion design with high adaptability to harsh mains conditions
- Real PF 1 can provide more power in same space
- · High efficiency results in energy saving
- Adjustable charging current and flexible battery configuration
- · Optimized changing method to expand battery life time.
- 10-20K 3-3 model can be configure as 3-1 or 1-1 model to meet utility and load wiring
- 10-20K 3-3 model can be configure as single source input or dual source input for utility and bypass
- Built-in OVCD protection, fan lock detection, over temperature detection, overload warning to enhance the product reliability

- Programmable outlet group will extend back up time for most critical equipment (6-20K need PDU model)
- Automatic detect additional EBM quantity will simplify EBM installation for IT users
- Compact size requiring small installation space
- Hot swappable battery will save customer service cost (For 1-3K standard UPS model)
- · Low audible noise at typical load
- Dot matrix LCD support up to 10 languages for easy installation and service. 10K 3-3 model support Color touchable LCD display with gravity sensors
- Embedded Ethernet port solution provide safe network connection to Cloud which will meet the increasing IoT trend
- · WLAN module for IoT connection
- Mobile APP for monitoring, configuration. Support Android/iOS
- USB HID enable monitoring on UPS without software installation
- Dry contactor for industrial condition
- · Upgraded network card compliance with IEC standard cybersecurity

Typical application

Financial

Work station

Network Hea

Health care Telecom

New full range double conversion UPS

High density, true double conversion on-line power protection for IT (Information technology) and OT (operation technology) applications. Capable of supporting loads from 1 to 20kVA in a rack/tower convertible form with a 2U/3U space.

These latest range of UPS comes with future-proof connectivity design having the capability to connect to cloud seamlessly to allow the monitoring of the UPS online through any internet connected device. To ensure users information is safe and protected, these connectivity is compliant with IEC standard cybersecurity and GDPR regulation.

Network connected and data to cloud

- · Easy to setup the Safe connection to Cloud
- · Connect to Cloud through MQTT protocol (the most widely used IoT protocol)
- Real time health monitoring on the equipment to enable business continuity and failure prevention
- · Remote monitoring, scheduled maintenance and UPS firmware upgrade *
- · Improve the data visibility to the service people and end user
- · Reduce the responsive time on product failure as Cloud push the exact information to end user and service people at the same time
- · Create value added service opportunities based on digitalization transformation
